The present invention describes a human monoclonal antibody to parathyroid hormone related protein (PTHrP). The monoclonal antibody or its fragments, following the stimulation of PTHrP has the following properties: (a) inhibits intracellular elevation of CAMP; (b) inhibits the release of calcium from bone; or (c) inhibits elevation of blood calcium content. The monoclonal antibody can be used in the treatment of hypercalcaemia, rheumatoid arthritis, cancer of bone including metastasis, pain, fracture, cachexia, diseases of teeth, periodontal diseases and gingiva, sepsis, systemic inflammatory response syndrome (SIRS) and hypophosphatemia. It has antiarthritic, cytostatic and antiinflammatory activities. The present sequence represents a human PTHrP monoclonal antibody clone protein sequence from the
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           A human monoclonal antibody to parathyroid hormone related protein. - useful for treating hypercalcemia, rheumatoid arthritis, cancer of bone including metastasis, and pain

                                                        The present invention describes a human monoclonal antibody to parathyroid hormone related protein (PTHTP). The monoclonal antibody or tits fragments, following the stimulation of PTHTP has the following properties: (a) inhibits intracellular elevation of CAMP; (b) inhibits the release of calcium from bone; or (c) inhibits elevation of blood calcium content. The monoclonal antibody can be used in the treatment of hypercalcaemia, rheumatoid antibody can be used in the treatment of hypercalcaemia, rheumatoid arthritis, cancer of bone including metastasis, pain, fracture, cachexia, diseases of teeth, periodontal diseases and gingiva, sepsis, systemic inflammatory response syndrome (SIRS) and hypophosphatemia. It has antiarthritic, cytostatic and antiinflammatory activities. The present sequence represents a human PTHTP monoclonal antibody clone protein sequence from the

1 monoclonal antibody to parathyroid hormone related protein. -
for treating hypercalcemia, rheumatoid arthritis, cancer of bone
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Human, parathyroid hormone related protein, PTHrP; monoclonal antibody; hypercalcaemia; rheumatoid arthritis; bone cancer; metastasis; pain; fracture; cachexia; tooth disease; periodontal disease; gingiva; sepsis; systemic inflammatory response syndrome; SIRS; hypophosphataemia; antiarthritic; cytostatic; antiinflammatory.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            The present invention describes a human monoclonal antibody to parathyroid hormone related protein (PTHrP). The monoclonal antibody or its fragments, following the stimulation of PTHrP has the following properties: (a) inhibits intracellular elevation of cAMP; (b) inhibits
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  the release of allium from bone; or (c) inhibits elevation of blood calcium content. The monoclonal antibody can be used in the treatment of hypercalcaemia, rheumatoid arthritis, cancer of bone including metastasis, pain, fracture, cachexia, diseases of teeth, periodontal diseases and gingiva, sepsis, systemic inflammatory response syndrome (SIRS) and hypophosphateamia. It has antiarthitic, cytostatic and antianthamatory activities. The present sequence represents a human PTHTP monoclonal antibody clone protein sequence from the
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  120
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           121 PTFGGGTKVEIKRTVAAPSVFIFPPSDEQLKSGTASVVCLLNNFYPREAKVQWKVDNALQ 180

included are anti-human Fas antibody CDR peptides (AAB12902-B12907).

Primers specific for the anti-human Fas antibody, light, heavy and kappa chains used in the invention are represented by sequences

AAA78213-A78266. Primers used for sequencing the human IG DNA used in the invention are represented by sequences AAA78277-A78318 and

AAA783215-A78337, while humanised anti-Fas IG DNA sequencing primers are represented by sequences AAA78217-A78334 and AAA78217-A78324 and AAA78217-A78324 and AAA78217-A78324 and AAA78318-A78324 and are used in the production of the agent of the invention.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       A human monoclonal antibody to parathyroid hormone related protein. - useful for treating hypercalcemia, rheumatoid arthritis, cancer of bone including metastasis, and pain
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Human; parathyroid hormone related protein; PTHrP; monoclonal antibody; hypercalcaemia; rheumatoid arthritis; bone cancer; metastasis; pain; fracture; cachexia; tooth disease; periodontal disease; gingiva; sepsis; systemic inflammatory response syndrcme; SIRS;

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          A human monoclonal antibody to parathyroid hormone related protein. - useful for treating hypercalcemia, rheumatoid arthritis, cancer of bone
                                             parathyroid hormone related protein (PTHTP). The annoclonal antibody or its fragments, following the etimulation of PTHTP has the following properties: (a) inhibits intracellular elevation of CAMP; (b) inhibits the release of calcium from bone; or (c) inhibits elevation of blood calcium content. The monoclonal antibody can be used in the treatment of hypercalcement, theumatoid arthritis, cancer of bone including metactasis, pain, fracture, cachexia, diseases of teeth, periodontal diseases and gingiva, sepsis, systemic inflammatory response syndrome (SIRS) and hypophosphatemia. It has antiarthritis, cytostatic and antiinflammatory activities. The present sequence represents a human PTHTP monoclonal antibody clone protein sequence from the

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   This is the amino acid sequence of a humanised anti-Fas antibody CH11 light chain, designated VL-KY. VL-KY is based on the light chain (see AAW1189) of murine anti-human Fas monoclonal antibody CH11. The humanised sequence was designed following selection of donor residues from CH11 to be grafted onto acceptor molecule RPMI6410'CL. 4 Light chain sequences (see AAW11876-79) have been designed, and each can be used in combination with either of 2 heavy chain sequences (see AAW1880-81) to provide novel, claimed humanised CH11 IgM antibodies that lack a J chain. These humanised anti-human Fas antibodies are capable of inducing apoptosis in cells expressing Fas (e.g. synoviccytes) and are useful in the treatment of autoimmune disease and chronic rheumatoid arthritis. The IgM protein confinction and segment, has apoptosis inducing activity, and consists of a light and heavy chain polypeptide produced synthetically. The agents of the invention exhibit antirheumatic and immunosuppressive activity and can be used to treat autoimmune diseases, especially rheumatism. The IgM molecule used in the invention has human Fas-antigen binding properties. Included in the invention are nucleotide sequences of the IgM light and heavy chains (see AAA/8267-A78272) and the nucleotide sequences of the Mumanised anti-human Fas Ig CH11 (see AAA/8202-A78206) and protein sequences (see AAB12908-B12919), Also
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Anti-human Fas immunoglobulin M light chain protein sequence SEQ ID #78.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             61 YLOKPGOSPKLLIYKVSNRFSGVPDRFSGSGSGTDFTLKISRVEAEDVGVYYCSQSTHVP 120

The present invention relates to antirheumatic agents which comprise as active ingredients an immunoglobulin M (IgM) protein. The IgM protein closes not include a J segment, has appopted inducing activity, and consists of a light and heavy chain polypeptide produced synthetically. The agents of the invention exhibit antirheumatic and immunosuppressive invention exhibit antirheumatic and immunosuppressive cotivity and can be used to treat autoimmune diseases, especially rhuning properties. Included in the invention are nucleotide sequences of the IgM light and heavy chains (see AAD12913-B12918 and the corresponding protein sequences (see AAD12913-B12918 and AAB12919), and nucleotide sequences of the humanised anti-human Fas IG CRH1 (see Corresponding protein sequences (see AAB12913-B12910). Also included are anti-human Fas antibody, CDR peptides (AAB12902-B12907). Primers apecific for the anti-human Fas antibody, Ilght, heavy and kappa chains used in the invention are represented by sequences AAA78210-B12918 and AAA8313-A78317-A78318. And AAA8313-A78317-A78318 and AAA8313-A78317-A78318 and AAA8313-A78317 are appended anti-Fas Ig DNA sequencing primers are represented by sequences AAA78318-A78317. Primer sequences AAA78312-A78312 are appended anti-Fas Ig DNA, and are used in the production of the agent of the invention.
                                        Anti-human Fas immunoglobulin M light chain protein sequence SEQ ID #80.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Anti-human Fas humanizing antibody-containing antirheumatic agents

The present invention relates to antirheumatic agents which comprise as active ingredients an immunoglobulin M (IgM) protein. The IgM protein activity ingredients an immunoglobulin M (IgM) protein. The IgM protein close not include a J segment, has apoptosis inducing activity, and consists of a light and heavy chain polypeptide produced synthetically. The agents of the invention exhibit antirheumatic and immunosuppressive activity and can be used to treat autolimmune diseases, especially. The agents included in the invention has human Pas-antigen creumatism. The IgM molecule used in the invention has human Pas-antigen binding properties. Included in the invention are nucleotide sequences of the IgM is and heavy chains (see AAB12913-B12918 and the cucleotide sequences of the humanised anti-human Fas in GH11 (see AAAP820-A78206) and protein sequences (see AAB12913-B12910). Also included are anti-human Fas antibody CDR peptides (AAB12902-B12910). Primers specific for the anti-human Fas antibody, Ilght, heavy and kappa chains used in the invention are represented by sequences by sequences AAA78213-A78366. Primers used for sequences by sequencing primers are represented by sequences AAA78213-A78317, while humanised anti-Fas Ig DNA sequencing primers are represented by sequences AAA78313-A78317, while humanised anti-Fas Ig DNA sequencing primers are represented by sequences AAA78313-A78367. Primer represented by sequences AAA78318-A78367. Primer represented by sequences AAA78318-A78367. Primer represented by sequences AAA78318-A78367. Primer represented by repres
                                                                                                                                                                                                                                                                                                                               Anti-human Fas immunoglobulin M light chain protein sequence SEQ ID #82.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   61 YLQKPGQSPRLLIYKVSNRFSGVPDRFSGSGSGTDFTLKISRVEAEDVGVYYCSQSTHVP 120

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      à
                                                                                                                                                                                                                                                                                                                                                  ö
                                     This is the amino acid sequence of a humanised anti-Fas antibody CC CH11 light chain, deasignated VL-KF. VK-KF is based on the light chain (see AAW71889) of murine anti-human Fas monoclonal antibody CH11. The humanised sequence was designed following selection of donor residues from (TH11 to be grafted onto acceptor molecule RPW16410'CL. 4 Light chain sequences (see AAW71876-19) have been designed, which are can be used in combination with either of 2 heavy chain sequences (see AAW71880-81) to provide novel, claimed humanised CH11 IgM antibodies that lack a J chain. These humanised anti-human Fas antibodies are capable of inducing apoptosis in cells capteressing Fas (e.g. synovicoryces) and are useful in the treatment of autoimmune disease and chronic rheumacoid arthritis. DNA sequences encoding the humanised antibodies are claimed, as are vectors such as pikrappakf2-19 including the VL-KF nucleotide sequence (see AAV61360), and host cells such as Bscherichia coli

This is the amino acid sequence of a humanised anti-Fee antibody CH11 light chain, designated VL-RY. VL-RY is based on the light chain, designated VL-RY. VL-RY is based on the light chain (see AAM71889) of murine anti-human Fee monoclonal antibody CH11. The humanised sequence was designed following selection of donor residues from CH11 to be grafted onto acceptor molecule RPMIGATO. Lt. 4 Light chain sequences (see AAW71886-79) have been designed, and each can be used in combination with either of 2 humanised CH11 IgM antibodies that lack a J chain. These humanised anti-human Fee entibodies are capable of inducing apoptosis in cells arti-human ferses and are useful in the breatment of autoimmune disease and chronic rheumatoid arthritis. DNA sequences encoding the humanised antibodies are claimed, as are vectors such as plkeappaRY2-10 including the VL-RY nucleotide sequence (see AAW6136), and host cells such as Bscherichia coli
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        121 PTFGGGTKVEIKRTVAAPSVFIFPPSDEQLKSGTASVVCLLNNFYPREAKVOWKVDNALQ 180
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    0; Gaps

The 1gM protein does not include a J segment, has apoptosis inducing activity, and consists of a light and heavy chain polypeptide produced synthetically. The agents of the invention exhibit antirheumatic and immunosuppressive activity and can be used to treat autoimmune diseases, especially rheumatism. The IgM molecule used in the invention has human Fas-antigen binding properties. Included in the invention are nucleotide sequences of the IgM and heavy chains (see AAA12913-1912918 and AAB12919), and nucleotide sequences of the humanised anti-human Fas and IG-111 (see AAA78202-A78306) and protein sequences (see AAB12913-1912910). Also nucleotide sequences of the humanised anti-human Fas anti-body, light, heavy and kappa chains used in the invention are represented by sequences (AAB12902-B12907). Primers specific for the anti-human Fas antibody, light, heavy and kappa chains used in the invention are represented by sequences AAA7813-A78366. Primers used for sequencing the human Ig DNA used in the invention are represented by sequences AAA7813-A78366. Primers used for sequencing the human Ig DNA used in the invention are represented by sequences AAA7813-A78366. Primers are corresponded anti-Fas Ig DNA sequencing primers are corresponded by sequences AAA7813-A78366. Primers appearing the humanised anti-Fas Ig DNA, and are used in the production of the agent of the invention.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Anti-human Fas immunoglobulin M light chain protein sequence SEQ ID #84.

This is the amino acid sequence of a humanised anti-Fas antibody CC CH11 light chain, designated VL-RF. VL-RF is based on the light chain (see baw11889) of mutine anti-human Fas amonoclonal antibody CC CH11. The humanised sequence was designed following selection of Gonor residues from CH11 to be grafted onto acceptor molecule RPMISIG10. L 4 Light chain sequences (see AAW11816-79) have been designed, and each can be used in combination with either of 2 heavy chain sequences (see AAW1880-81) to provide novel, claimed humanised antibodies that lack a J chain. These humanised antibodies are capable of inducing apoptosis in cells expressing Pss (e.g. symoviocytes) and are useful in the treatment of autoimmune disease and chronic rheumatoid arthritis. DNA sequences encoding the humanised antibodies are claimed, as are vectors such as phtkappaRP2-52 including the VL-RF nucleotide sequence (see AAV61362), and host cells such as Bscherichia coli
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          0; Gaps

                                                                                                                          2 Polypeptides (AAW01819 and AAW01820) respectively comprise primatised forms of the light and heavy chains of cynomolgus monkey anti-human B7.1 antigen monoclonal antibody 7B6. Cloned 7B6 light and heavy variable genes (see also AAT62511 and AAT13847) are inserted into an expression vector (pref. NEOSPLA) which contains human light and heavy chain constant region genes to allow prodn. of the primatised antibody in e.g. CHO cells. Primatised 7C10 and 16C10 anti-B7.1 antibodies have also been produced (see also AAW01817-19 and AAW01821-22). The primatised antibodies have also been produced (see also AAW01817-19 and antipodies have also been produced (see also AAW01817-19 and awking them useful immunosuppressants for the treatment of autoimmune disorders and graft-versus-host disease.

This sequence represents a primatized form of the antibody 786 light chain from macaque. This sequence is used in a method which studies new monoclonal antibodies (MADs s) that bind selectively to BT.1 (CD80) or to BT.2 (CD86) antigens and inhibite binding of these antigens to CD28. Such MADs are specific immunosuppressants for treatment of diseases involving a call opathic thrombocytopaenia purpura, systemic lupus erythematosus, type idiopathic thrombocytopaenia purpura, systemic lupus erythematosus, type idiapates mellitus, rhemmatory disease and tumours operation and inflammatory disease and tumours (obtionally the chort diseases, B cell lymphoma, infections (including by human immune deficiency virus) or inflammatory disease and tumours to Optionally combined with other proteins or small molecule immunosuppressants. Blocking BT/CD28 interactions or induces long-term, antigen-specific immunosuppression, i.e. it inhibits production of interleukin-2 (IL-2), T cell proliferation and antigen-specific immunosuppress.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Human, macaque monkey, light chain, primatised antibody, 7B6 antibody, neuroprotective, apoptosis inducer, allergy, CD28 receptor antagonist, by 1 antigen, CD80, B7 2 antigen, CD86, B cell cancer, metastasis, tumour, B cell ymphoma; B cell leukaemia, autoimmune disease, graft-vs-host disease, immunosuppression, organ rejection, interleukin-2; IL-2; mutant, mutein.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Protein sequence of primatised form of the light chain of 7B6 antibody.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             61 YQQKPGQPPRLLIYKVSNRDSGVPDRFSGSGAGTDFTLKISAVEAEDVGVYFCGQGTRTP 120

No. is the number of results predicted by chance to have a
score greater than or equal to the score of the result being printed,
and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             28tcd0 homo
